Leaving Rio, we pass through the Park of Flamengo, recently elected one of the Seven Marvels of Rio de Janeiro.

Crossing Ponte Rio-Niterói, inaugurated in 1974, with 13.3km of extension, on the Bay of Guanabara arriving at the city of Niterói, an old capital of the State of Rio.

We go to the Museum of Contemporary Art inaugurated in 1996. Projected by architect Oscar Niemeyer, it was built at the Observatory of Boa Viagem (of the Good Trip), a privileged place that leans on the waters of Guanabara Bay and it takes the visitor's glance to the other side, where there are the Corcovado and Sugar Loaf. The Museum has been considered a world tourist referential.

We arrived to the Park of the City, a biological reserve of the municipal district, located in Viração Hill which occupies an area of 150 km<sup>2</sup>.

In that place exists a natural source and an observatory from where one can have a panoramic vision of ponds and beaches of Niterói, the Bay of Guanabara, in all your extension from the open sea and some neighborhoods of Rio de Janeiro.

We continue our trip, crossing Tiririca Mountain, a natural limit between Niterói, São Gonçalo and Maricá, that has a beautiful view of Mata Atlântica, where we stop to take pictures.

At the end of the mountain we arrive at the Beach of Itaipuaçu ,where it begins our off- road adventure, going by land and sand passages on an environmental protection area , going through beautiful beaches until the lunch stop in a pleasant restaurant at the sea's edge at the beach of Itaúna that 's famous for his international surf championships.

After the lunch, we continue, outlining the Pond of Araruama , where we can see the area of the old salt beds. Going through Bikini Street, at Cabo Frio historical city where, depending on the schedule, we can make a stop for purchases. Afterwards we continue through Però road to Búzios , where it finishes our adventure.

It's a Full Day program with lunch.
