

Diving in Abrolhos 4 days / 3 nights

Abrolhos archipelago is formed by 5 small islands: Redonda, Siriba, Guarita, Sueste and Santa Bárbara and the Parcel of Abrolhos. This complex of Coral reefs, protected by the National Park is considered one of the most rare and beautiful in the South Atlantic, because of its diversity. The archipelago is a very important natural preservation area, protecting migratory birds, sea turtle and others species that use Abrolhos for resting and nesting.
